

SWANBANK CLEAN ENERGY HUB

Our 2050 vision is for Swanbank to be recognised as a flagship precinct that connects the community, businesses and customers to new sustainable energy solutions. It respects and celebrates the site's past and present, and optimises its future contributions to the ongoing prosperity of the region.

Objectives

Net zero - Play a key role in supporting Queensland's energy transformation to net zero.

Sustainability - Capitalise on the location and existing critical infrastructure for sustainable connection to the site, its surrounds and the region.

Renewable energy solutions - Deliver renewable energy solutions that support and attract industries of today and of the future.

Community prosperity - Give the community a precinct that celebrates the past, enhances the environment, and supports the ongoing prosperity of the region.

Flagship precinct - Demonstrate a flagship energy precinct that matches customer needs and outcomes.
